Conclusion

WHAT IS PRETCA?

An integrated prescription delivery system that bridges the gap between hospitals and pharmacies, ensuring smooth and secure prescription delivery to patients' doorstep

WHY WE NEED PRETCA?

Lack of connection between Hospitals and Pharmacies when delivering the Prescriptions

TOOLS, APIS AND ASSETS

- Web-based Applications
- Secure Prescription Transmission
- Pharmacy Integration

OBJECTIVES

- Streamline prescription fulfilment by establishing a direct connection between hospitals and pharmacies.
- Reduce the need for patients to visit multiple locations for prescription collection and filling.
- Improve medication adherence and patient safety by minimizing delays and potential errors during the

BENEFITS

- Convenience for Patients
- Time and Cost Savings
- Enhanced Patient Safety

ALTHOUGH THESE WEB/MOBILE APPS THAT PROVIDE
MEDICAL SERVICES OVER THE INTERNET, WE DO NOT SEE
AN IT SOLUTION THAT ALLOWS COMPUTERIZED
PRESCRIPTIONS TO BE USED IN PLACES SUCH AS
PHARMACIES AND LABORATORIES.

APPLICATION

- Can be implemented
 - healthcare systems
 - hospitals
 - pharmacies
- Can be scaled to serve a wide range of patients, including those with limited mobility or in remote areas
- Can be accessed through
 - web portals
 - mobile applications

CONCLUSION

By integrating hospitals, pharmacies, and delivery logistics, our prescription delivery system aims to enhance the patient experience, reduce healthcare costs, and improve medication adherence and safety
